

Who are we?

St. Johns RIVERKEEPER® is a 501(c)(3) nonprofit advocacy organization for the St. Johns River and its watershed.

- **Our Mission** is to work on behalf of the community for clean and healthy waters in the St. Johns River, its tributaries and its wetlands, through citizen-based advocacy.
- **We Believe** that the unique natural beauty and ecological integrity of the St. Johns River System must be preserved and remain accessible for the enjoyment and benefit of current and future generations.
- **We Promise** to advocate for policies and restoration actions based on sound science and responsible economics, and to speak on behalf of the river with an independent voice that the citizens can trust.

St. Johns RIVERKEEPER offers these class/group presentations and field trips/outings to schools, home-school parents and the community to educate kids and adults about the St. Johns River and the issues that are impacting its health.

Scheduling is flexible, however, these programs are offered on a limited basis.

If interested, please contact our Education Director, Tracey Manno:
