

DIY Recycling Bin

Materials

- Cardboard box
- Scissors
- Duct tape
- Decorating materials (optional): colored masking tape, markers, stickers, construction paper

Instructions

1. Inspect your box. Use the duct tape to repair any parts of the box that may be open on the bottom or sides (but leave the top open!).
2. Fold the top box flaps in, or cut them off, to make an open bin.
3. (Optional) You may also use the duct tape to cover the entire bin. This will help reinforce the recycling bin for many uses!
4. Decorate your recycling bin.
Examples: You may choose to cover old packing slips with construction paper, add masking tape, stickers, and/or draw on it!
